

Measures against novel coronavirus infections

Measures in the public space

Alcohol disinfection of public areas such as the reception, elevators, and restaurants are carried out and alcohol disinfectants are provided. We regularly ventilate the public areas around the reception, elevators, and restaurants.

Measures for employees

To prevent infection, the reception and restaurant staff wear masks and regularly disinfect their hands with alcohol.

Measures for check-in procedures

We will take your temperature and confirm your identity on check-in.

Measures in the restaurant

Breakfast is served in small bowls, and rice and miso soup are served by employees. We will also reduce the number of seats to prevent the Three Cs.

Cleaning measures

We will thoroughly disinfect, ventilate, and comply with cleaning measures.
